

The Virtual Lincoln City Race 2019, Men's UltraVets Course.

Use Google Maps Street View (not Google Earth) to navigate your way around the course prepared by Norman Hall, answering the questions at each control.

Strong hint: for controls 3 and 13, you will need to exploit all the elements available to you in Street View – dragging the yellow man, blue circles (still photos) and sometimes clicking on the screen. You cannot get right next to control sites 2, 3, 5, 6 and 13 but answers can be seen from a distance. When you have finished, send your answers and time to complete the course to me at orienteingj@gmail.com and I'll award DEE free run vouchers. Thanks to LOG chairman John Mather for allowing us to use their map.

Good luck!
Jane and Norman
